

## AFTERMARKET SERVICES

MEYER Aftermarket Services provides a single source for the inspection, machining, welding, repair, remanufacture and recertification of Oilfield Pressure Control Equipment. MAS performs all work to OEM and API standards, ensuring that your equipment provides continuing value to your operation and maximizing your ROI. We provide expert wellhead equipment repair and BOP maintenance services. In addition, MAS will carry a large of inventory of new parts and components to fulfill any requirements.

MAS's Repair Capabilities include: welding, buffing, polishing, stress relief, hardness testing, chrome plating, hard good repair, soft goods, inlay, internal coatings, and shearing upgrades. MAS is able to provide inspection as well as hydraulic and hydrostatic testing.

MAS is fully equipped at all of our Nationwide service locations with parts and tools fully stocked to service and repair all of the below BOP varieties. Whether the repair takes place in our shop, your shop, or on location - MEYER has you covered for reliable oilfield equipment aftermarket services.

API 6A-2224
