

A decorative graphic in the top left corner consisting of a red triangle pointing down and a blue triangle pointing up, meeting at a white diagonal line. Below this, a series of white right-pointing triangles are arranged in a row.

HYDROSTATIC MOBILE TEST UNIT

MEYER's Hydrostatic Mobile Test Units are used to quickly and safely field test valves and wellhead components. Long hoses allow operators to work from a safe distance away.

Standard Features

- 100 HP John Deere diesel motor
- NOV 15,000 psi Triplex pump
- Single or dual 225-gallon poly tank
- Pressure-Trol valve for easy use and quick repairs in the field
- 10 micron stainless steel filter housing filters supply and return fluid
- Stainless steel relief valve with redundant rupture disc assembly
- Twin disc clutch

Options

- 50 HP - 285 HP John Deere diesel motor
- NOV 20,000 psi Triplex pump
- 225-gallon to 750-gallon
- High Flow 45 GPM dump valve
